

Assignment -2
Python-flask Programming

Assignment Date	19 September 2022
Student Name	Ms. P. Abarna
Student Roll Number	612419104001
Maximum Marks	2 Marks

Question-1:

Question-1:

1. Create a Flask App
2. Add the Home page, About Page
3. Add the Bootstrap
4. Add the Sign in page and App the Signup Page+ database connectivity

app.py:

```
from site import USER_BASE
from flask import Flask, render_template, url_for, request, redirect
import sqlite3 as sql

app=Flask(__name__)
app.secret_key = 'shreesathyam'

@app.route('/')
def home():
    con = sql.connect('user_base.db')
    con.row_factory=sql.Row
    cur=con.cursor()
    cur.execute('select *from user')

    users= cur.fetchall()
    con.close()
    return render_template('index.html', users=users)

@app.route('/about')
def about():
    return render_template('about.html')

@app.route('/signin')
def signin():
    return render_template('signin.html')

@app.route('/signup')
def signup():
```

```

        return render_template('signup.html')
@app.route('/user/<id>')
def user_page(id):
    with sql.connect('user_base.db') as con:
        con.row_factory = sql.Row
        cur = con.cursor()
        cur.execute(f'SELECT * FROM user WHERE email="{id}"')
        user = cur.fetchall()
        return render_template("user_info.html", user=user[0])

@app.route('/accessbackend', methods=['POST', 'GET'])
def accessbackend():
    if request.method == "POST":
        try:
            firstname = request.form['firstname']
            lastname = request.form['lastname']
            e_mail = request.form['email']
            phone = request.form['phone']
            password = request.form['password']
            dob = request.form['dob']

            with sql.connect('user_base.db') as con:
                cur = con.cursor()
                cur.execute('INSERT INTO user (firstname, lastname, email,
phone, password, dob ) VALUES(?,?,?,?,?,?)',
(str(firstname), str(lastname), str(e_mail), str(phone), str(password), str(dob)))
                con.commit()
                msg = 'u r resgistered!'

        except:
            con.rollback()
            msg = 'some error'

        finally:
            print(msg)
            return redirect(url_for('home'))
    else:
        try:
            tue = request.args.get('email')
            tup = request.args.get('password')
            print(tue, tup)
            with sql.connect('user_base.db') as con:
                con.row_factory = sql.Row
                cur = con.cursor()
                cur.execute(f'SELECT password FROM user WHERE email="{tue}"')
                user = cur.fetchall()

        except:
            print('error')

```

```

        con.rollback()
    finally:
        if len(user) > 0:
            if tup == user[0][0]:
                return redirect(url_for("user_page", id=tup))
            print(user[0][0])
        return redirect(url_for('signin'))

```

About.html:

```

{% extends 'base.html' %}

print("table created")
conn.close()
```

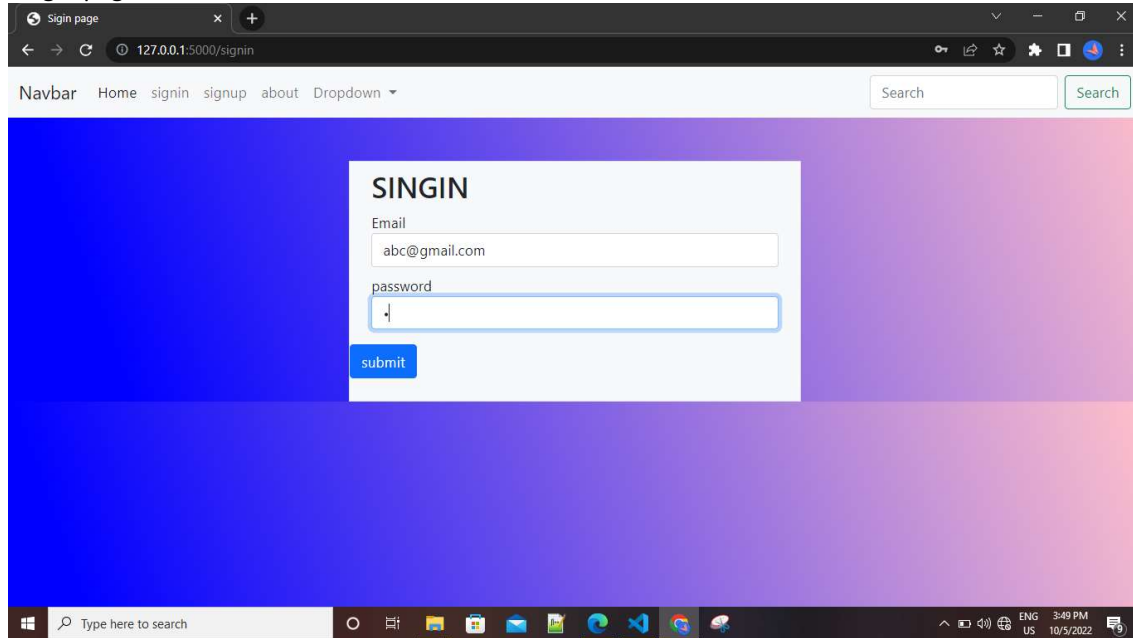

output:

Signup:

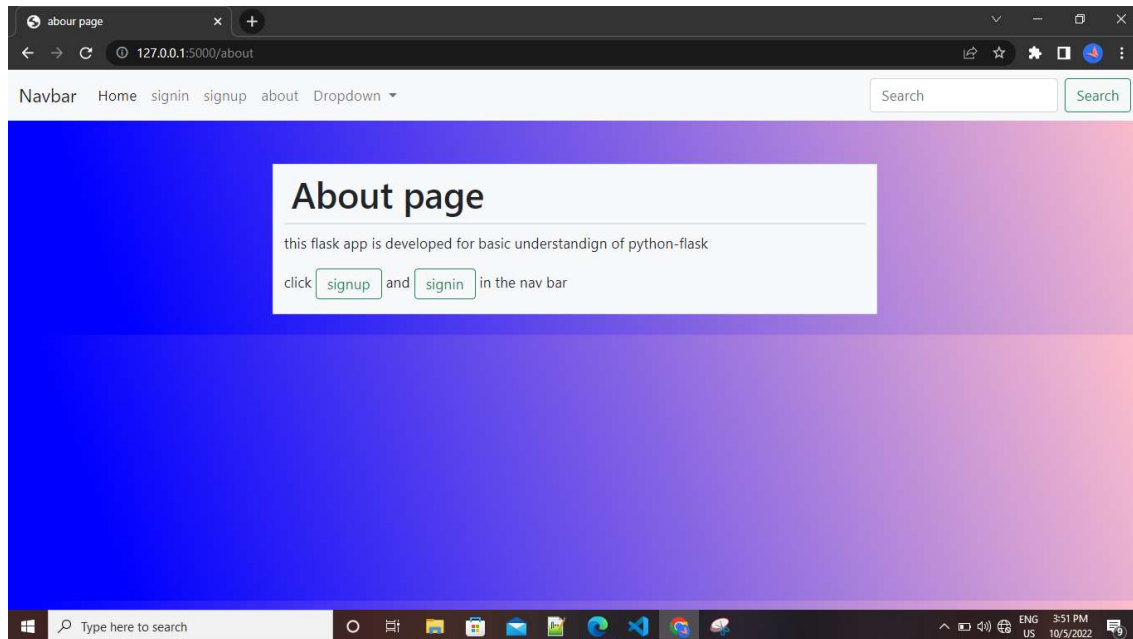

The screenshot shows a web browser window with the title "Signup page". The address bar displays "127.0.0.1:5000/signup". The page features a navigation bar with links: "Navbar", "Home", "signin", "signup", "about", and a "Dropdown" menu. A search bar is located on the right side of the navigation bar. The main content area has a blue and purple gradient background. In the center, there is a white box titled "SIGNUP" containing a form with the following fields: "first name" (value: raj), "last name" (value: sekar), "email" (value: official@gmail.com), "phone" (value: 0987654321), "password" (value: masked with dots), and "date of birth" (value: 02/08/2002). A "submit" button is located at the bottom of the form.
